

HAMZA BOUSSETTA

Software Engineering Student

Rabat, Morocco | hb.hamza.bst@gmail.com | +212 649 797 790

Portfolio: hamzabsst.me

PROFILE

Software engineering student at 1337 Coding School (UM6P), nearing completion of the Common Core, with a degree in Mathematics and Computer Science. Practical experience in C, C++, Python, and Docker.

EDUCATION

1337 Coding School (UM6P), Rabat Oct 2024 - Present

Software Engineering Program

- Common Core nearing completion; project-based learning with peer review and collaborative development.

ENS, Tetouan Sep 2021 - Aug 2024

Degree in Mathematics and Computer Science

SELECTED PROJECTS

Afterglow | Watch Together App

Built a real-time watch-party app using React, Node.js, Express, and Socket.IO.

- Implemented synchronized YouTube playback, invite-based rooms, and live chat.
- Added WebRTC voice chat and screen sharing, with host controls and reconnection handling.

LeakLens | Valgrind Log Visualizer

- Built a browser-based tool in HTML, CSS, and JavaScript to parse Valgrind Memcheck logs, group memory errors, and compare runs. All log processing stays local.

Minishell

- Developed shell functionality for command execution, built-in commands, quote parsing, and environment variable expansion.
- Worked on redirections, pipes, and signal handling, with a focus on memory leak checks using Valgrind.

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript

Web: HTML, CSS

Tools and practices: prompt engineering, Docker, Valgrind, debugging, memory management, peer review.
